

As a trucker I feel the services that XM satellite radio offers is very vital to my well being. I am able to avoid areas that is heavily congested and plan my trips accordingly. The same thing with weather. At times I have a light load in my trailer and I can plan my trip around high winds that would possibly cause my trailer to roll over. This service is vital to me plan a safe trip for me and the motoring public around me. If this service wasn't available I could not find out until I got there and then it may be too late.
